APEX GLOBAL TECHNOLOGIES INC.
PART I · ITEM 1A. RISK FACTORS & ITEM 7. MANAGEMENT OUTLOOK

Disclosed Risk Factors:
1. Cybersecurity and Network Vulnerabilities: The Company's cloud infrastructure stores sensitive corporate and customer data. Any unauthorized breach, ransomware incident, or zero-day vulnerability could impair customer trust, trigger substantial regulatory penalties, and disrupt operations. The Company mitigates this risk through mandatory multi-factor authentication, regular third-party SOC 2 Type II audits, and continuous perimeter penetration testing.
2. Semiconductor Hardware Supply Chain Delays: Lead times for advanced AI server accelerators and networking switches have lengthened. Extended supplier delays could defer platform deployments and increase capital costs. The Company mitigates this risk by dual-sourcing compute hardware and maintaining a strategic safety stock.

Management Forward Outlook:
· For the full fiscal year 2025, management projects total revenue to be between $1,400.0 million and $1,450.0 million, reflecting continued strong enterprise cloud customer adoption.
· Operating margin is expected to expand by approximately 150 basis points in FY2025 as platform automation matures.
· Capital expenditures for FY2025 are budgeted at approximately $80.0 million to support data center expansions.
